1. Hath Milao (FYP)

Our proposed system is a job and internship portal which is a place where students, industrial companies and universities can interact with each other. Students can find jobs and internships, apply for a particular job and internship and attempt weekly challenges easily. Companies can post ad for jobs and internships, give weekly tasks. Career centres also ensures that every student of their university gets the job. They can easily track which student is jobless. Universities and companies will be able to manage job fairs. Companies can create any event, workshop and webinar. Universities will be able to create any on-campus events. Students can view and register themselves in that event. Career centre will be able to view the profile of student if in case of any mistake they can contact with student and alumni to help them to avoid these kinds of mistakes. Companies can also see the profile of students and alumni. Student and alumni can see the recommended jobs and internships in their home page. Companies can also see the recommended candidate in their home page. Students, alumni, companies and career centre have a dashboard in which they will be able to see the statistics of different thing

1.1 Mobile App

Mobile app is made in react-native which runs on both android and ios. Following are the packages used:

Package	Motivation
Native-base	For designing UI as it provides cross-platform components
Axios	To perfrom http request
React-native-gifted-chat	For Chat screen UI
react-native-image-picker	To get image from phone and extract base64 string
react-native-joi	For form validations
react-native-loading-spinner-overlay	For loading screens
react-native-modal	For forms
react-native-root-toast	To inform user that event has been performed
react-native-ui-kitten	For react-native-gifted-chat
react-navigation	For routing and navigation
sendbird	For real-time chat
